

CAD/CAM Protocol System

1. *Chlorophyll a* and *Chlorophyll b* contents were determined using a spectrophotometer (Shimadzu UV-1601) at 663 nm and 646 nm, respectively. The total chlorophyll content was calculated using the following formula: $\text{Total Chlorophyll} = \frac{1}{22.2} \times \text{Absorbance at 663 nm} + \frac{1}{22.9} \times \text{Absorbance at 646 nm}$.
